

HERZmed GRIP fitted sheet
Disposable

HERZmed GRIP fitted sheet - disposable

Versatile fitted sheet - waterproof, hygienic and stable.

The HERZmed GRIP transfer sheet is designed for short-term, single-use in healthcare facilities such as hospitals, emergency services, patient transportation and nursing homes. The transfer sheet is impermeable to water and forms a physical barrier against the direct transfer of potentially contaminated germs to the patient.

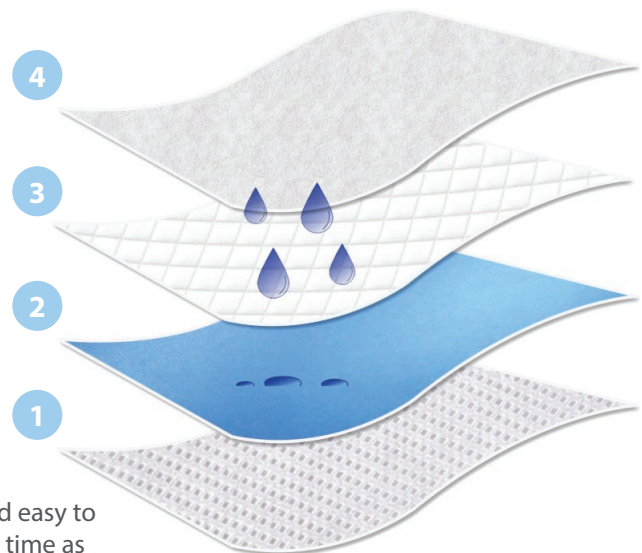

The HERZmed transfer sheet GRIP is a versatile sheet with 8 sturdy handles, which is not only suitable for lifting, carrying and pulling patients weighing up to 180 kg, but also serves as an excellent waterproof carpet pad (holds approx. 2.8 liters) and for back-friendly transfers.

It also increases the patient's comfort and well-being during the stay or transportation.

Detail view

Four-layer structure of the cover sheet:

1. the weight-bearing fleece (nonwoven) is covered with
2. coated with a PE film (waterproof)
3. a layer with absorbent polymer
4. thin fleece material

Application

HERZmed transfer sheet GRIP is waterproof, tear-resistant and easy to use. It is used purely as a patient transfer aid and at the same time as an absorbent carpet pad during patient transport.

First place the patient on the transfer sheet and then transfer to the stretcher. The patient should only be transferred over short distances and at a low height. A rescue sheet must be used for longer distances or patient recovery.

Patients already positioned on the HERZmed GRIP transfer sheet can be transferred quickly and easily from the stretcher directly to a hospital bed using a rollboard.

Safety instructions:

HERZmed Transfer Sheet GRIP may only be used as a transfer aid for repositioning patients at short distances and low heights.

It does not replace a rescue/transport sheet or spineboard.

There is a risk of injury if used incorrectly!

Versatile fitted sheet

Carpet pad and transfer cloth with handles in one product.

Grips

Safe and stable thanks to the 4 handles on both sides.

Stark

Load capacity up to 180 kg.

Water impermeable

Holds up to 2.8 l liquid.

Dimensions

Size: approx 210 x 80 cm

Individual packaging

Quick and clean use.
Individually vacuum-packed.

Hygienic working environment

The use of the GRIP ONE-WAY transfer sheet ensures the highest standards of hygiene. It also increases comfort and well-being during the patient's stay or transportation. It can be disposed of with the normal waste.

The product is a **disposable product!**
